

Newtex Extreme Protective (NXP) Suit Sizing Chart

Suit sizing is based on the physical measurements of the wearer. For best fit, measurements should be taken over the clothes worn under a NXP Suit.

NXP Suit Sizes				
Wearer's Measurements	Small / Medium	Large / X-Large	XXL	XXXL
Chest	Up to 40" (Up to 101.6 cm)	41-47" (104.1-119.4 cm)	48-52" (121.9-132.1 cm)	53-58" (134.6-147.3 cm)
Waist	Up to 36" (Up to 91.4 cm)	37-48" (94.0-121.9 cm)	49-50" (124.5-127.0 cm)	51-53" (129.5-134.6 cm)
Inseam	Inseam of the suits will fit wearer from 60-76" (152.4-193.0 cm) tall.			

If the physical measurements of the wearer are outside of the standard sizes listed, suits with custom measurements and design modifications are available upon request.

	150 & 550 Series	750 & 850 Series	2000 & 3000 Series
Coat Length	32" (81.3 cm)	36" (91.4 cm)	34" (86.4 cm)

FIT:

Due to the layers of insulation and technology involved in high temperature protection, our NXP Proximity, Kiln and Fire Entry suits are designed to fit loosely. Each suit size is designed to accommodate a range of personnel physical dimensions. Suit construction is based on standard measurements. Some variation in fabrication may occur.
