

GENERAL DESCRIPTION: ZETEX 720 Z-Pro fabric is coated with a proprietary coating. The base fabric is manufactured using highly texturized silica yarn.

PHYSICAL PROPERTIES:

Weight:	25 Oz./Square Yard
Construction: Warp x Fill	20 x 18
Weave:	Plain
Thickness:	0.035"
*Breaking Strength: (minimum)	Warp - 350 lbs. Fill - 350 lbs.
*Abrasion Resistance, Taber:	700+cycles to failure using CS 10 wheel with 1000 grams weight resistance at 50% vacuum level.
*Temperature:	Continuous temperatures to 1100°F (593°C) and higher short duration temperatures.
*K Factor (Heat Conductivity):	0.3399 BTU/inch/hr/sq ft/°F

ORDERING INFORMATION:

Length of Roll:	50 Yards
